

2 of 4: Performance, Planning, Emergency Procedures, Risk Management, and mitigations.

The big fan motor is making lots of noise, the cooling breeze is welcome relief from the heat and then...all of a sudden there is nothing but silence. Now all of your skill sets come into action at one time, aircraft control, where to land, reading the winds from the surface conditions, panic control and survival. Remember when you used to look at your flight instructor for the answer to saving the day? Guess who didn't make the flight with you today?

Directions: Fly in: Park on the ramp west of the tower. Walk through the old terminal building and east along Rutter Avenue to Moody Aviation. Limited aircraft parking is also available on the Moody Aviation ramp. Drive: Take exit 286 from I-90. Turn north on Park Street, left on Rutter Ave. Moody Aviation will be on the right.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
